Introduction

Paragon Studio was built on a single idea: that wellness spaces deserve the same consideration as any other room in an exceptional home.

Our Core Product Range is made by hand in our UK workshop, using FSC-certified timber, recycled steel, and materials chosen as carefully as the clients we work with. We don't believe in catalogue finishes and mass production. We work alongside each client until the result is entirely their own, functional in the truest sense and built to last a lifetime.

Our Design Process

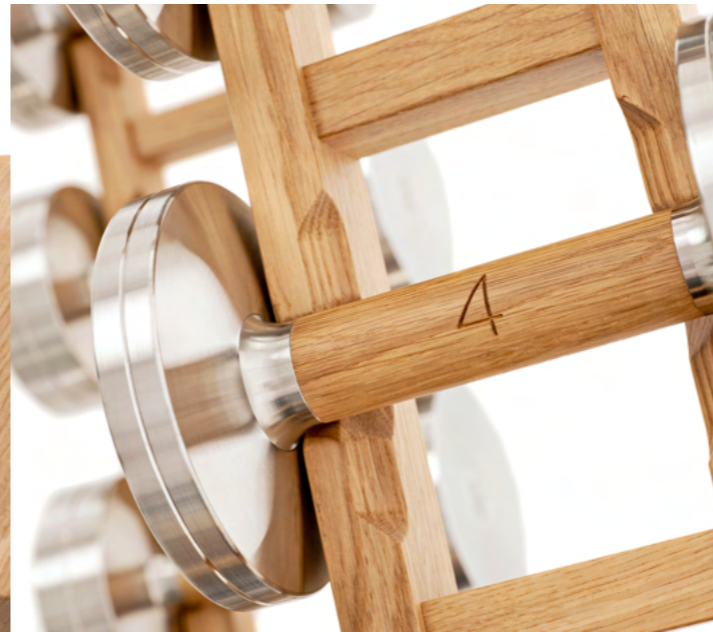

When we are working on developing new products for our range, our aim is to put function first and then design the form around it. This results in gym equipment that is more than just an ornament - each piece is made for tough workouts.

Once a product is ready to be prototyped, our engineers will begin to discuss how we can integrate sustainable materials and processes into the build in order to cut emissions.

Because each piece is made to order, our team are able to approach a project with a blank canvas and incorporate any bespoke requirements a client has during the pre-production phase.

This gives us unrivalled flexibility within our range, which is loved by clients and designers worldwide. As we continue to innovate and make unique changes to our products as requested by individual clients, we are continually learning new techniques and making improvements to our core product range.

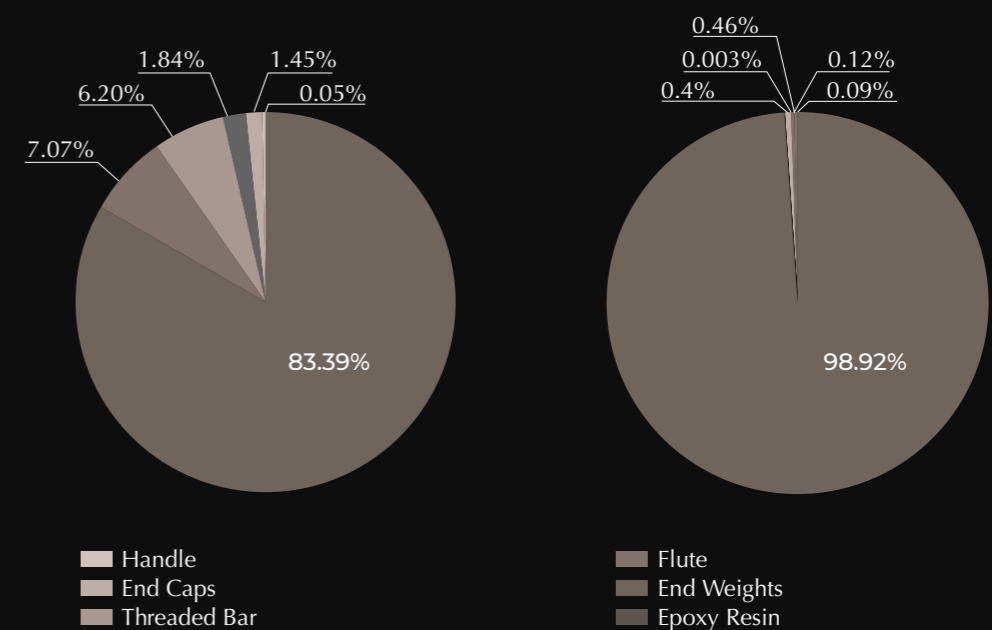

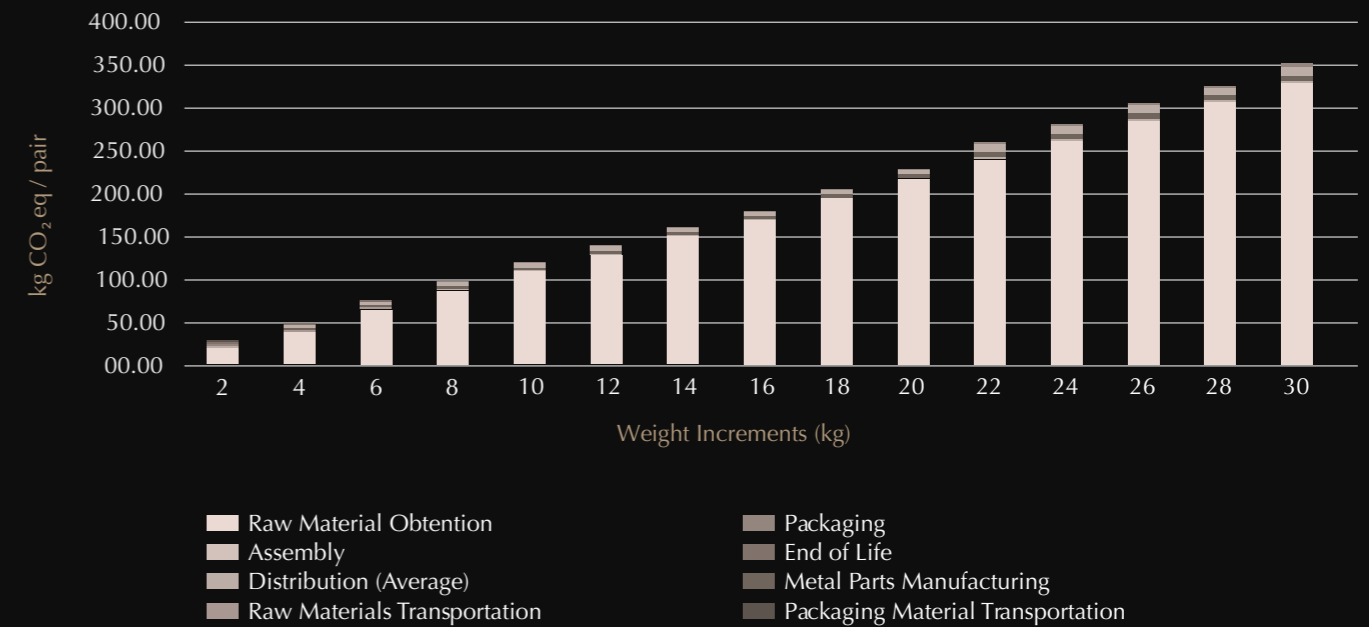

Route to Carbon Neutral

Our Diabolo Dumbbells are designed with environmental responsibility in mind. The inspiration behind our award-winning Diabolo Dumbbells was to create a beautifully crafted, high-quality product with sustainability at its core. Made from responsibly sourced materials and 100% recyclable, they reflect our commitment to reducing environmental impact without compromising on design or performance.

To ensure transparency, we partnered with an independent sustainability specialist to assess their full lifecycle. Carbon Managers conducted a comprehensive lifecycle assessment (LCA), measuring all greenhouse gas emissions and CO₂ equivalents (CO₂e) associated with manufacturing, packaging, distribution, use, and end of life.

This ongoing process allows us to better understand, reduce, and offset the impact of our products as we continue to evolve the range.

Classic Range

Diabolo Dumbbells

Prices from £4,076 (Ex VAT)

Our award winning Diabolo Dumbbells are the result of years of experience in the superyacht and prime property industries.

A truly over-engineered design, these dumbbells offer unparalleled levels of customisation and a uniquely concave end design. Choose our sustainable wooden handles and customise with laser engraving to add a touch of bespoke to your gym.

Resistance Loops

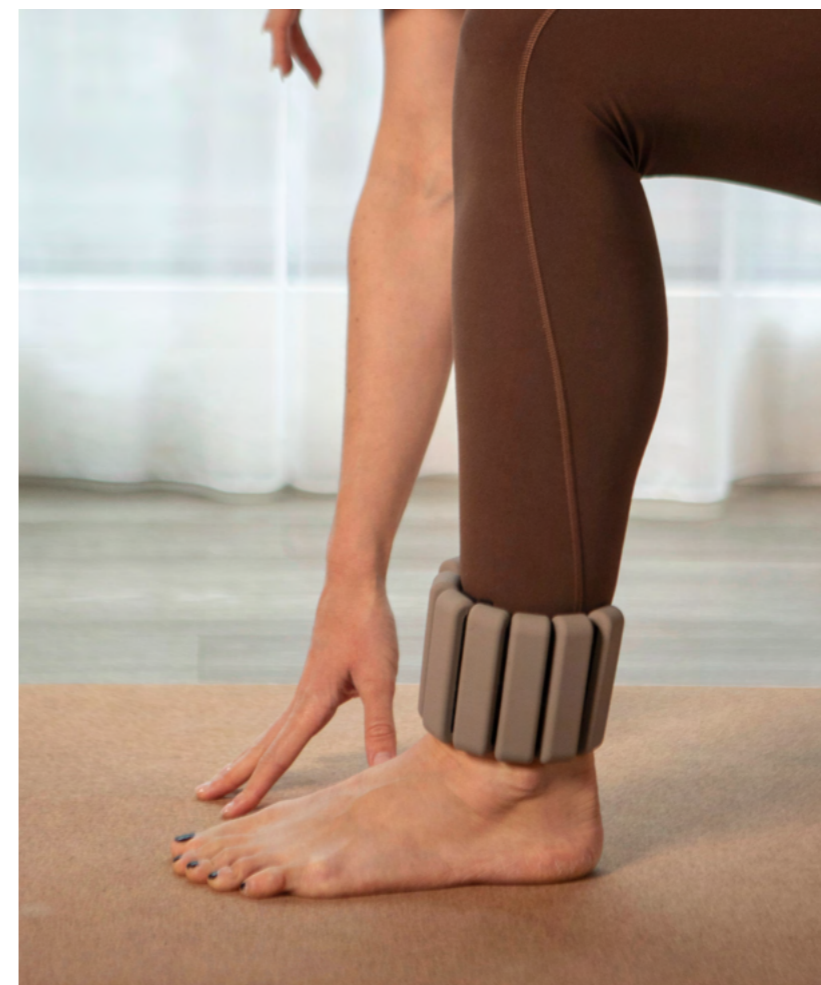

£20 (Ex VAT)

A set of four flat resistance bands designed to support controlled strength, mobility and muscle activation through Pilates, sculpt and low-impact training.

Designed for performance and everyday versatility, the Paragon Studio Resistance Loops combine understated aesthetics with functionality. Made from durable latex with an anti-slip finish, each band delivers smooth, consistent resistance while remaining comfortable. The flat, minimalist profile allows for seamless integration into Pilates, sculpt and strength focused training.

Resistance

X Heavy, Heavy, Medium, Light

Pilates Ankle Weights

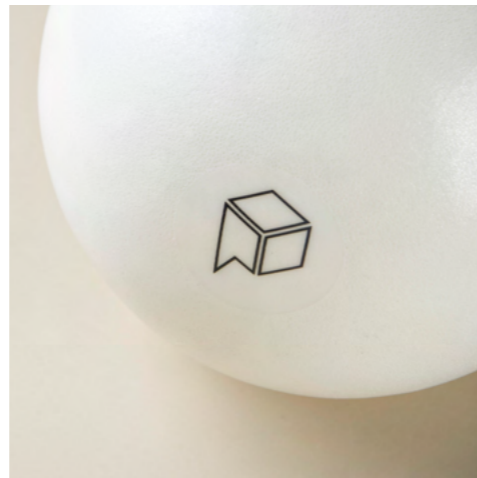

Prices from £26 (Ex VAT)

Elegant, sweat-proof Ankle Weights introduce gentle resistance to enhance movement without distraction. Made from soft sweat-proof silicone, they balance durability with comfort, allowing the body to move freely while maintaining a secure, supportive feel throughout every session.

The adjustable Velcro fastening ensures an effortless, tailored fit and the weighted design supports stability, strength and muscle tone through low-impact training. Ideal for Pilates, Barre, Yoga Sculpt, walking and light cardio, they transition seamlessly between practices and spaces.

Weight

0.5kg, 1kg, 1.5kg

Pilates Ball

£10 (Ex VAT)

Designed to subtly elevate every Pilates session, the Paragon Studio Soft Pilates Ball introduces controlled instability that enhances core engagement, balance and postural awareness. It's form allows it to support or challenge the body with precision, whether placed behind the lower back, between the knees or ankles, or held in the hands, encouraging deeper muscle activation without interrupting the natural rhythm of movement.

Finished with an anti-slip surface and anti-burst construction for added safety, the ball offers reassurance as well as performance, gently deflating under pressure rather than bursting.

Dimensions

20cm diameter

Pilates Ring

£40 (Ex VAT)

A lightweight Pilates Ring or Magic Circle designed to subtly intensify mat-based training by adding gentle, controlled resistance that supports alignment, stability and full-body strength. Used between the hands or legs, it encourages deeper engagement through the arms, chest, inner thighs and core, refining technique while maintaining the natural flow of movement.

Soft-foam padded handles provide a comfortable, secure grip and allow for smooth transitions between exercises, making the ring approachable for a wide range of abilities. Easy to incorporate into existing routines at home or in the studio.

Dimensions

36cm diameter

Pilates Hand Weights

Prices from **£52** (Ex VAT)

Designed to build strength with precision and control, the Paragon Studio Sculpt Pilates Hand Weights bring subtle resistance to low-impact training. Carefully balanced to enhance stability, alignment and coordination, allowing you to increase intensity without compromising form, ideal for Pilates, Barre, Sculpt and strength-focused movement.

The smooth, comfortable grip supports secure handling through controlled sequences and extended sessions, encouraging fluid transitions and consistent technique.

Material Options

Material Options

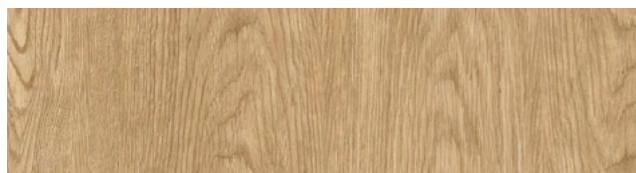

At Paragon Studio, we offer clients bespoke equipment across our entire collection. Alongside our standard selection of materials, our range of products can be made in any wood or metal finish you can imagine.

We encourage clients and designers to suggest their own material finishes for each individual component of the equipment, carefully matching and sampling new techniques where necessary to improve the final product.

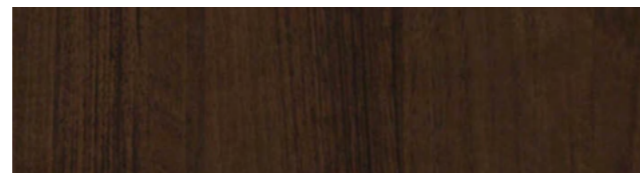

Woods

Oak

Elegant and classic, our European Oak is sourced from sustainable forests. The beautiful wood grain has a natural pattern, making each piece unique.

Walnut

Prized for its strength and durability, American Walnut has a velvety finish in its grain and a rich brown colour.

Iroko

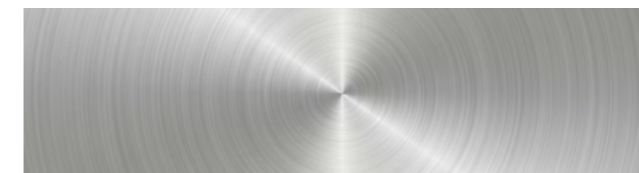

A warm and rich wood, which is elegant and durable. We use Iroko in place of traditional Teak to ensure sustainable and ethical sourcing.

Blackwood

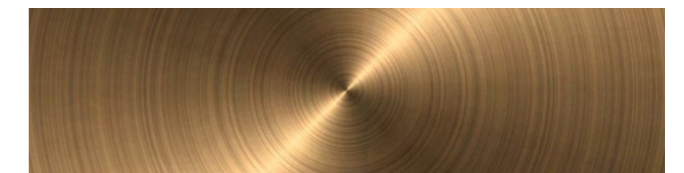

Deep black stained Oak which allows the natural wood grain to show through. Hand finished in the UK, this material holds its colour to stand the test of time.

Metals

Stainless Steel

Elegant and hardwearing, Steel offers a uniform and highly reflective finish which compliments all interiors. Turned or polished with an elegant shine.

Bronzed Steel

A popular gold hue that is delicate yet opulent. Eclectic warm tones will tie your gym design together. We use Aluminium Bronze or PVD coating to achieve this look.

Finishes

Brushed

A textured and understated metal finish. Offers an all-purpose, textured effect that gives the metal a smooth, unidirectional appearance.

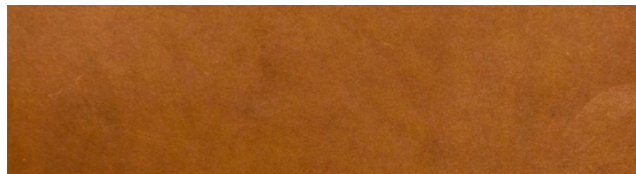

Polished

Hand treated metal with a highly-polished mirror finish characterised by a bright, shiny and reflective surface.

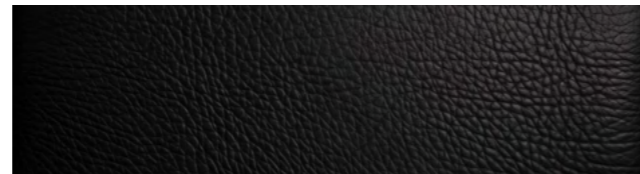

Leathers

**Leather is a natural material and shades may vary*

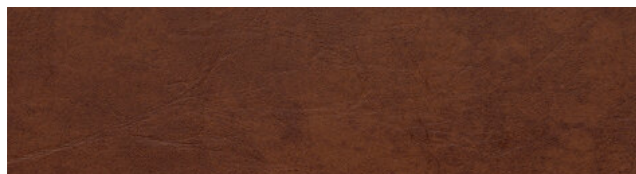

Tan

A sustainably sourced durable leather. Rich and velvety in colour, robust against cracking and wear, it gets better with time.

Black

A classic and timeless leather finish. Features a soft sheen that accentuates the textured appearance of the leather.

Brown

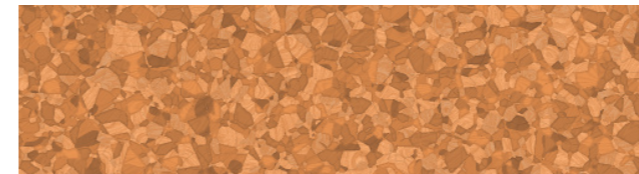

Easy to clean and condition, protecting against damage. Rich and earthy tones with a textured matte finish, a classic and subtle leather.

Cream

A rich and natural leather that resists fingerprints and scuff marks. Its light structure gives it an exceptionally soft, velvet-like texture.

Cork

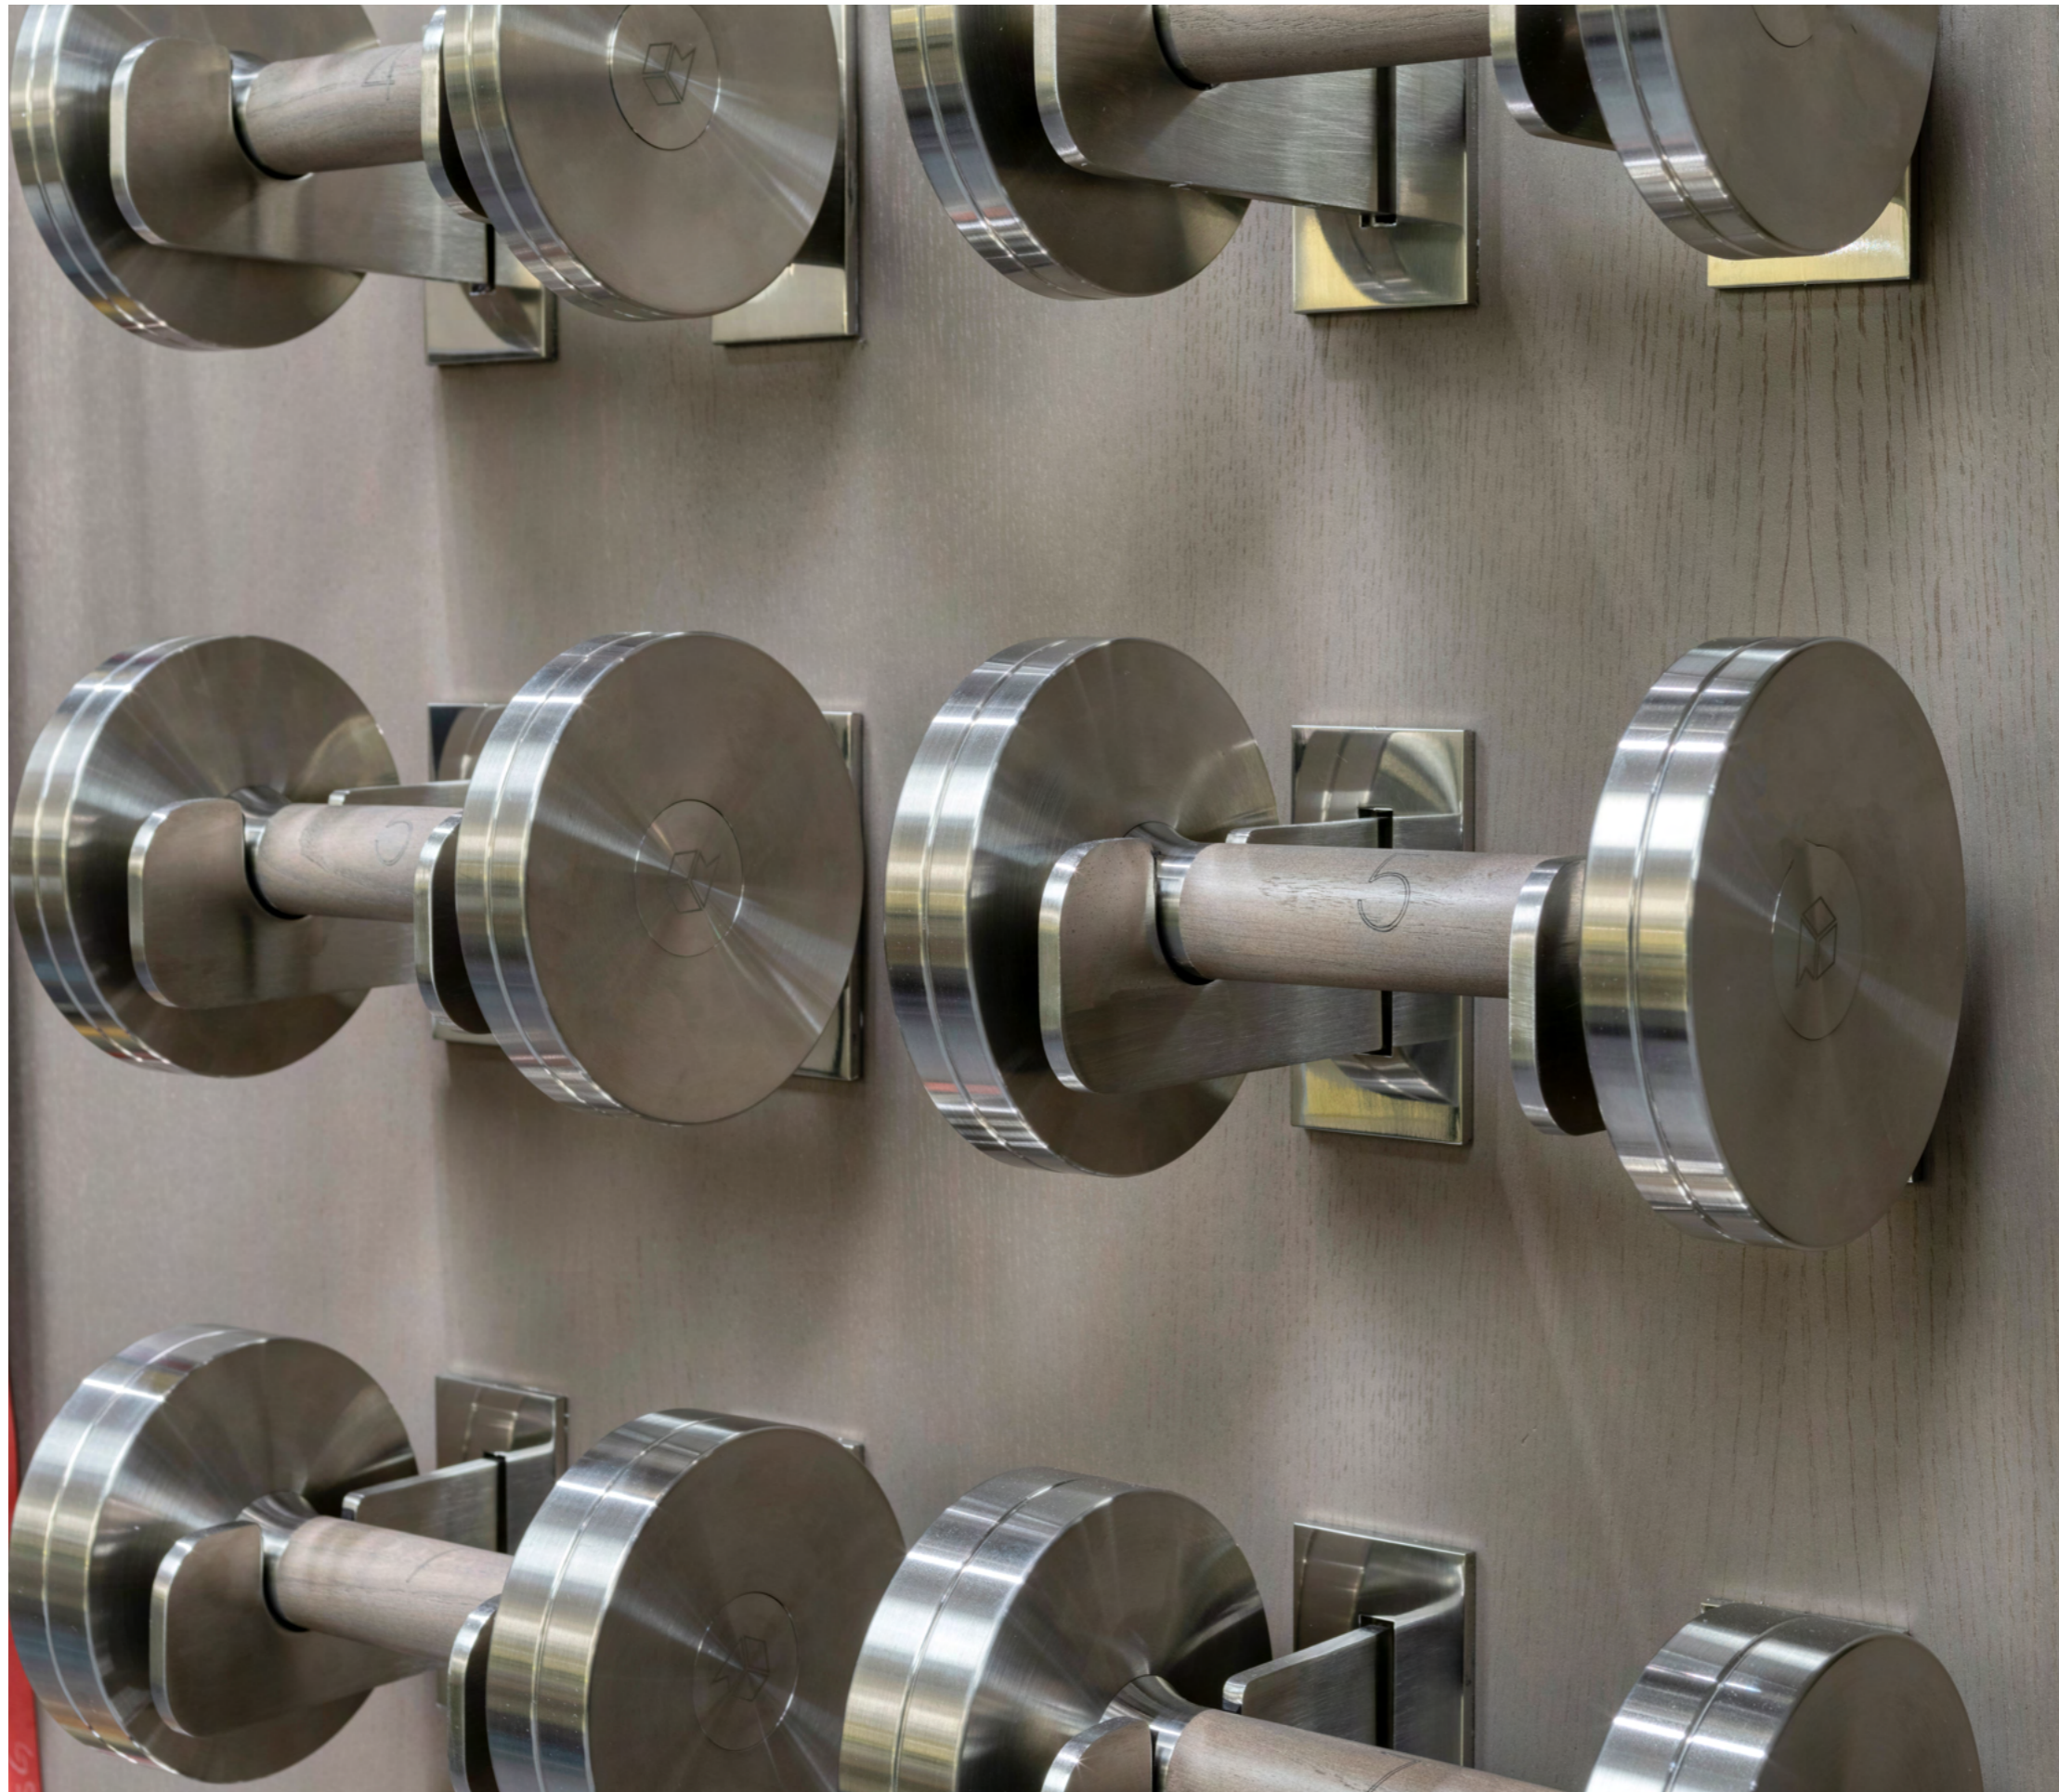

Natural Cork

A sustainable and soft finish for yoga equipment, cork offers low density cushioning. The perfect lightweight and durable material.

Custom Options

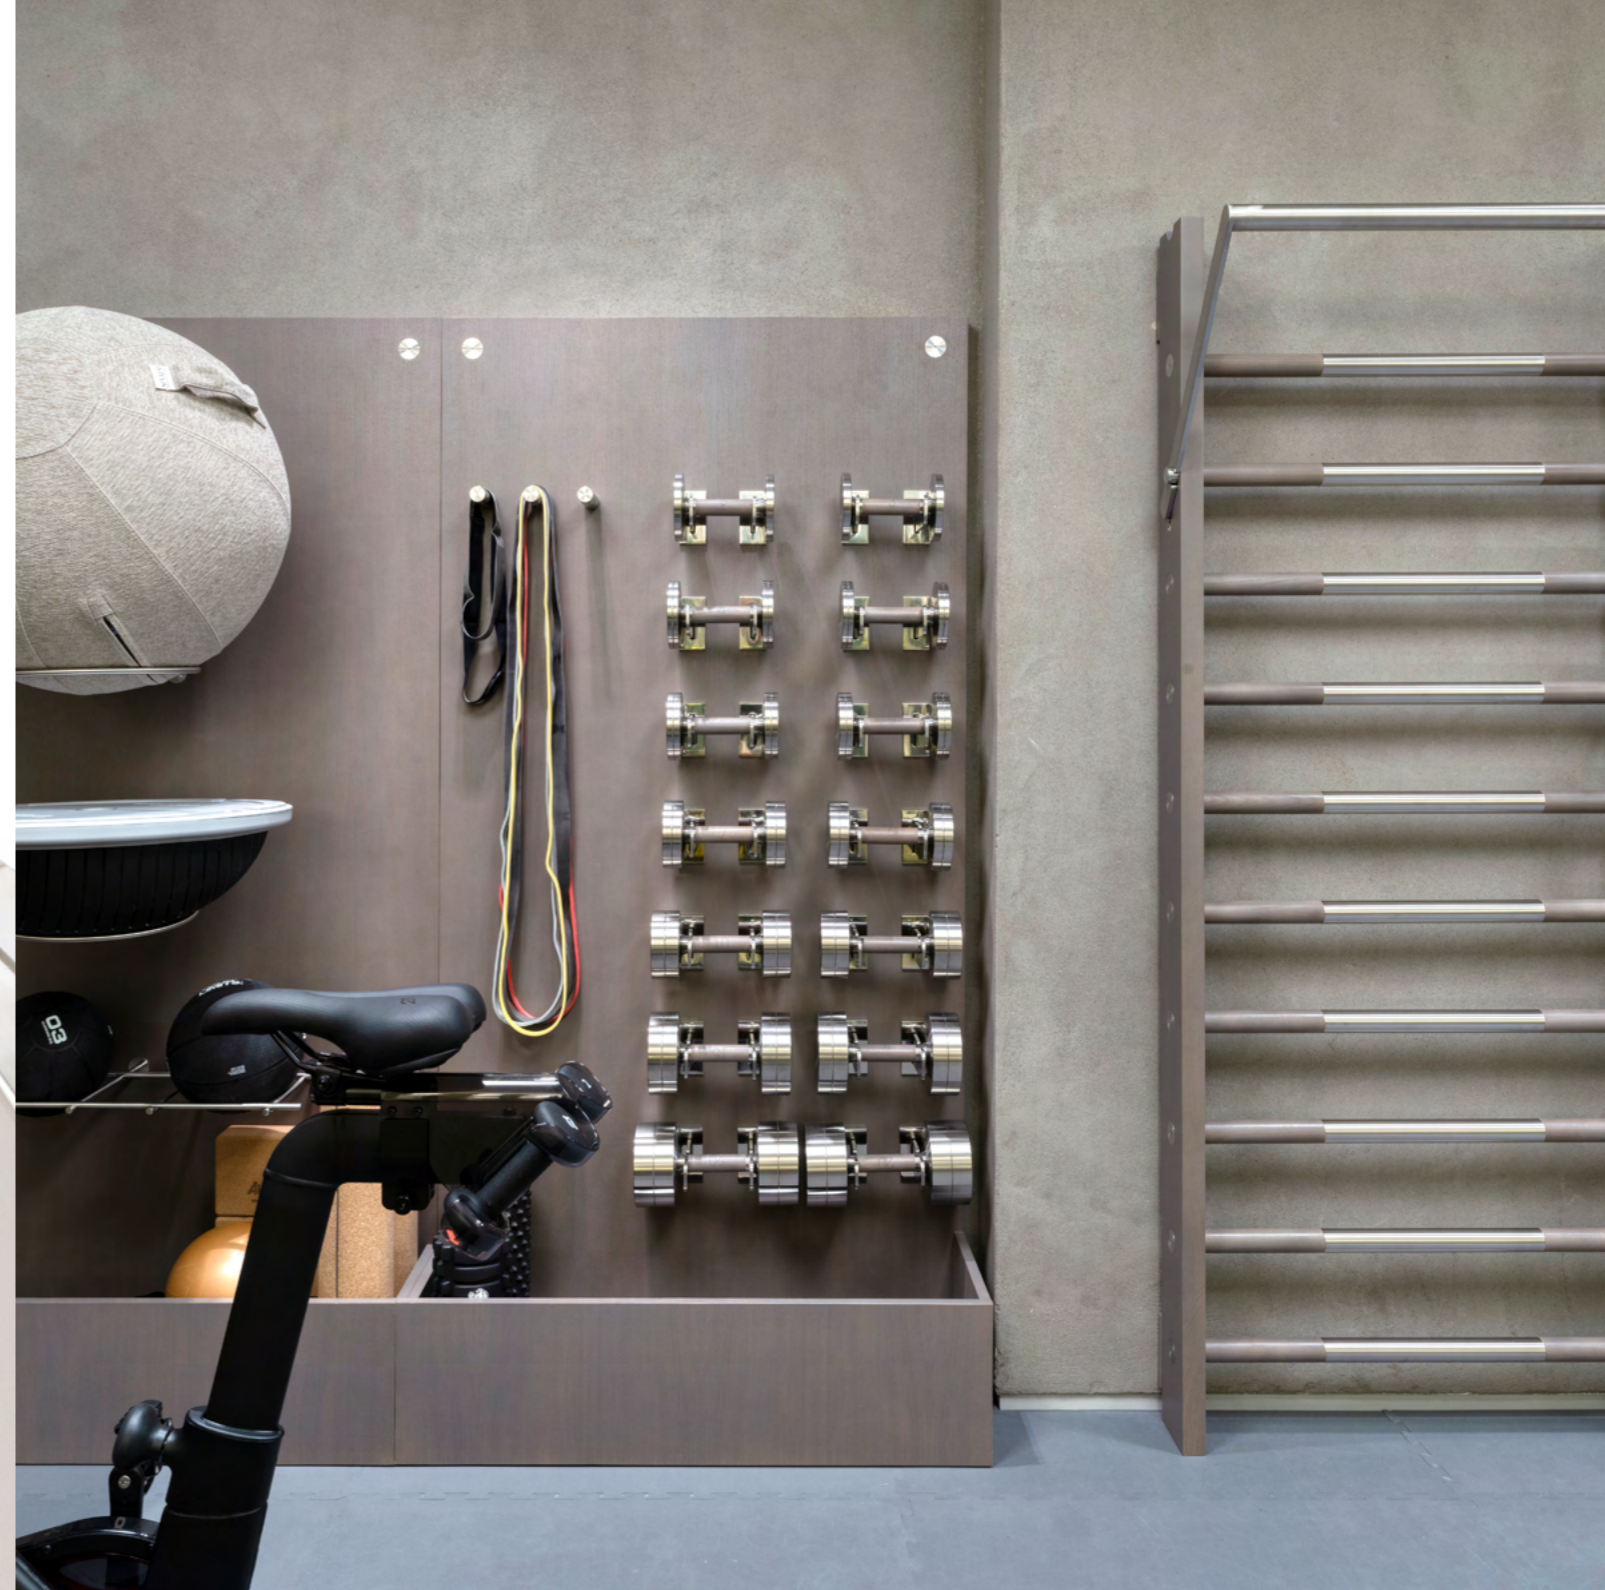

Custom Options

At Paragon Studio, our goal as a business is to combine the ergonomics of exercise with an aesthetic consideration which sets our gym designs apart from the average workout area. As a team, we have years of experience in creating highly desirable spaces, we go above and beyond creating customisable and bespoke pieces of equipment that are unique to each individual interior and client.

Our dumbbells feature the perfect surface to add your own bespoke logo with laser-etching. For this project, as well as using the property's own personal monogram, we created a bespoke stain to achieve this soft black wood finish which was designed to achieve a monochrome look throughout the gym, blending our equipment in with the cardio equipment.

We recently completed our most ambitious project yet for some fantastic London based clients in their basement home gym. We were able to custom stain the wood on their equipment to seamlessly extend their already established interior aesthetics. Everything was chosen to coherently match and complement the design.

This project was completed for a major UK interior design firm who requested we use a mismatched wood for the dumbbell handles and racks.

A bespoke bleached Oak was used for the racking, and for the dumbbell handles our American Walnut was chosen.

As seen here on this project, if required, the end plates can be laser engraved so that weight increments can be clearly displayed in the centre of the surface. Equally, rubber bands can easily be incorporated around the discs of your weights. These bands protect both your weights and flooring from damage during use.

Case Studies

OWO Penthouse

The OWO Penthouse has been designed by international studio Winch Design, who combine their decades of experience in creating superyacht, private aircraft and residences for ultra-high net worth clients, with a timeless and joyful scheme that champions craftsmanship, artistry and the OWO's historical and cultural significance.

In the design of the five-bedroom lateral penthouse, Winch Design collaborated with over forty award-winning suppliers to craft and source bespoke pieces of furniture, fabrics,

artwork and accessories, creating a residence that feels carefully curated over time. Featuring a private gym and sauna, cinema and games room, staff quarters and expansive terraces with panoramic views, The OWO Penthouse is a truly one-of-a-kind residence.

We were delighted to outfit the gym space with equipment from our range, and the beautiful NOHRD Bike in Oak.

Chelsea Home Gym

This beautiful duplex apartment in London was totally refitted by its owner in the Summer of 2023 by Noba Interior Design.

Originally 2 separate dwellings, the properties were connected and turned into a single home for a client who frequently travels internationally for business, but has a passion for staying healthy.

Paragon Studio were commissioned to do a complete design of the gym including provision of bespoke

equipment in Oak and Steel; and recommendation of supplementary accessories and flooring.

For this ambitious project we created our first triple wall storage unit – with a new module to hold both dumbbells and kettlebells. This has now become a staple within our range of configurable storage options.

A NOHRD Slim Beam, also in Oak, completes the gym with a smart and compact cable training facility.

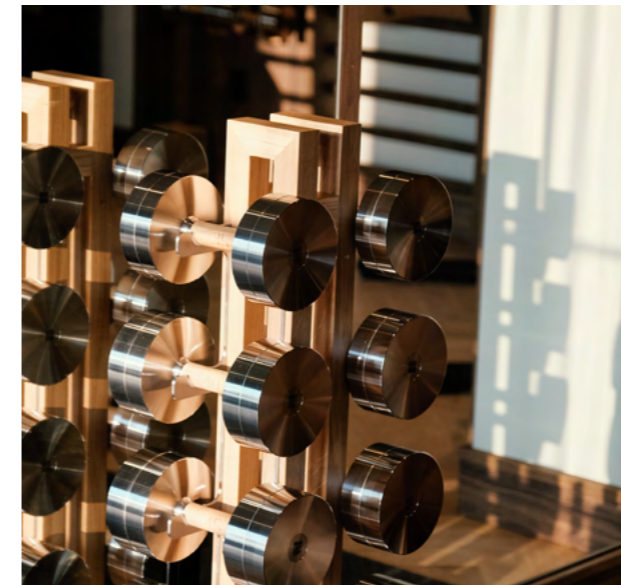

Arabian Ranches, Dubai

Nestled in a quiet corner in the Arabian Ranches neighbourhood, this effortlessly stylish home gym is the latest addition to a family home which has undergone an extensive redevelopment.

The owner was particularly forward thinking in the use of wall space to keep the floor area tidy, and our vertical wall storage options for free weights therefore suited the design perfectly.

The level of organisation in this gym is seriously impressive; every item has a hook or a dedicated storage box right down to individual pairs of gym trainers.

Overall this is a stunning space and we are very grateful to this wonderful family for allowing us to play a small part in their beautiful home.

The Manchester Hotel

Working with the hotelier and his design team, Paragon Studio were delighted to be involved in this boutique gym project right in the heart of Lexington's famous Bourbon district.

The gym replicates the incredible finishes incorporated throughout the hotel; built to mirror Kentucky's unbridled enthusiasm, warm Southern light, and full-galoped feeling.

Our team worked on the gym layout design, and created a kit list including Paragon Studio's Adjustable Benches and Boxing equipment with the hotel logo debossed into the leather pads. We also specified Diabolo Dumbbells with the logo laser engraved into the end plates, matching racks and cork yoga equipment.

Lastly, Peloton and Precor were brought in to the project to complete the cardio and strength offering.

Tuscany Villa

This Tuscan Villa is owned by a family who are enthusiastic about their training and have gyms in their properties around the world. The project we completed in late 2023 with Pippa Paton Design.

The standout feature of this converted garage gym is the set of enormous glass doors at the front; letting in the light

and allowing fresh air to flood into the gym during the summer months when they are open.

Our equipment was specified in Oak and Steel, with heritage brown and tan leathers being chosen to meet the design brief.

Golden Goose Arena

Combining sport, sophistication, and exclusivity, the Golden Goose Arena venue presents a contemporary interpretation of the members' club experience – centred around the booming sport of Padel.

Golden Goose is a world famous Italian fashion brand, and this foray into sport plays into their core identity as a luxury marque which appeals to active and adventurous clients.

In addition to its state-of-the-art courts, the upper members' lounge offers a multifunctional environment for events and wellness activities.

A sweeping curtain reveals a bespoke wall installation conceived and executed by Paragon Studio, showcasing premium gym equipment and workout accessories distinguished by Golden Goose's iconic star emblem.

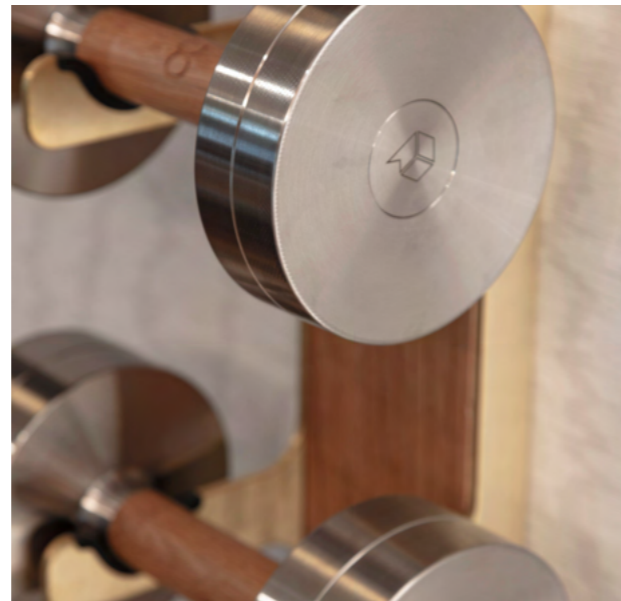

Ohio Family Home Gym

Located in a stunning family home in Ohio, this bespoke luxury gym project was a collaborative success between Paragon Studio, the homeowners, and Cloonan Design. Transforming an upper-level space, Paragon Studio meticulously designed a serene yet high-performance fitness area, seamlessly blending relaxation with rigorous training and the home's elegant aesthetic.

The gym features a comprehensive selection of premium equipment, including treadmills, benches, and free weights. A key design highlight is the unique material palette, which

creates a compelling contrast between the cold, metallic finish of the steel weights and the warm, custom powder-coated bronze finishes of the brackets and squat rack. To ensure a safe and clutter-free environment, we developed innovative vertical storage for weights and accessories, integrating custom hardware components into the millwork. This project exemplifies Paragon Studio's commitment to creating sophisticated, functional home gyms that enhance luxury residential spaces.

Partnerships

Paragon Studio x gym80 collaboration

The gym80 x Paragon Studio strength line comes as standard with a bespoke wooden element incorporated into each machine where possible; which the Paragon Studio workshop will produce to match other wooden equipment or joinery in the gym. Clients will be able to select from a range of modern paint colours, and will have the option to match upholstered pads to other leather products in the Paragon Studio range.

Gym80 is a German company which was founded in 1980, and is well known for producing strength machines of the highest quality and with industry-leading biomechanics. Gym80 also prides itself on offering clients the opportunity to fully customise their products; offering up numerous paint finishes and a huge range of luxury leather upholstery choices, as well as more unique customisations like laser-cut framework and shrouds which give machines the appearance of a piece of sculpture.

The collaboration covers all equipment in gym80's pin-select series; with over 100 different fixed strength stations with weight stacks available.

Showroom Locations

Now, you can explore our collection - we have showrooms to visit globally, including:
